Nicole Nguyen: Since Amazon sold books, they've had reviews on the site, yes

Kate Linebaugh: And sellers go to great lengths to get those reviews.

Nicole Nguyen: Review manipulation happens in all sorts of ways. There are Facebook groups that have willing participants, people who get free stuff in exchange

for reviewing those products. They're also these websites that give more specific directions. The website will say, "Search for this specific search term and then buy the product and then we'll refund you via PayPal."

Catherine Scott: I am in Seattle for a friend's wedding. And the hotel apparently does not have stuff available till 4:00, so I found a stairwell that no one

is using. So yes, it's my commitment.

Kate Linebaugh: Have you ever written a one-star review before?

Catherine Scott: I got multiple emails saying something to that effect of, "Please, please, please, please delete the review." It wasn't a threatening, angry tone. It was literally like they were begging me to delete the review and they kept saying USD 20, USD 20. We'll refund. And I ignored it.

Kate Linebaugh: Catherine reported all of this to Amazon twice. And she was told

that Amazon was looking into the matter. But the seller and the product stayed up. Yeah, has this incident made you feel differently about shopping online or shopping on Amazon specifically?

Kate Linebaugh: What level of what confidence do you think consumers should have in the reviews they see on Amazon's site?
