What is the spread in sports betting?

Bookmakers set a spread with the hopes of getting equal action on both sides of a game.

The -3 points is the spread.

The spread at -3 suggests the teams are fairly equal and maybe in this case, the

Colts are only -3 because they are playing at home.

The difference is that their odds may be set at -140 to win.

On the other end, the Texans could be +120 to win.

In a spread bet, even if the Texans won straight up, you'd still only win t

he bet because they lost by less than three points.
